About Us

At Sanaya Techs, we are committed to pioneering innovative technological solutions that empower businesses to thrive in a digital world. Our team of experts specializes in delivering cutting-edge software development, IT consulting, and digital transformation services tailored to meet the unique needs of each client.

With a focus on quality, efficiency, and customer satisfaction, we strive to turn challenges into opportunities, driving growth and success in an ever-evolving technological landscape. Partner with us to unlock the full potential of your business.

Innovation

Pioneering technological solutions for a digital world.

Quality

Focus on efficiency and customer satisfaction.

Growth

Turning challenges into opportunities for success.

Our Vision

To be a global leader in technological innovation, driving the future of digital transformation. We aspire to create a world where businesses seamlessly integrate advanced technology to unlock their full potential.

Global Leadership

Driving innovation worldwide

Future Growth

Unlocking business potential

Sustainability

Achieving long-term success

Our Mission

At SanayaTechs, our mission is to deliver innovative and reliable technological solutions that empower businesses to achieve their strategic goals. We are dedicated to excellence in every project, ensuring that our clients can harness the power of technology to drive growth, improve efficiency, and stay ahead in an ever-evolving digital landscape.

Innovation

Cutting-edge solutions

Tailored to your needs

SOLUTIONS

1. Networking & Security Solutions

At SanayaTechs, we offer comprehensive networking and security solutions designed to protect your business from evolving cyber threats while ensuring seamless connectivity. Our services include robust network infrastructure design, implementation, and ongoing management, combined with advanced security measures such as firewalls, intrusion detection systems, and encryption. We focus on providing secure, scalable, and reliable solutions that support your business's growth and resilience in the digital age.

Advanced Network Design

Robust and scalable network infrastructure tailored to your business needs.

Security Solutions

Comprehensive security measures including firewalls, intrusion detection, and data protection.

Compliance & Standards

Adherence to industry standards and compliance frameworks for data protection.

1. Networking & Security Solutions

1. Software Defined Network
2. WAN and LAN Infrastructure
3. Data Center Networking
4. Wireless Solutions
5. Network Monitoring and Management
6. Endpoint Protection and Teleworkers Solutions
7. Security Fabric (Orchestration and Automation)
8. Next-Generation Firewall
9. Secure SD-WAN
10. Advanced Threat Protection
11. SOC Platforms (Analytics, Reporting & Response, SIEM)
12. Web Application Security
13. Secure Email Gateway
14. Secure Remote Access
15. Data Leak Prevention and Risk Management

2. Structured Cabling

SanayaTechs delivers reliable, scalable structured cabling solutions for modern businesses. We design and install high-quality systems that support high-speed data, voice, and advanced networking—ensuring seamless connectivity, strong performance, and future-ready infrastructure.

Organized Infrastructure

Professional cabling systems that support current and future network requirements.

High Performance

Fiber optic and copper cabling solutions for reliable data transmission.

Professional Installation

Expert installation and certification to ensure optimal performance and compliance.

3. IP Telephony & Video Conferencing Systems

Unified Communications

Integrate voice, video, and messaging into a single platform for seamless communication.

Cost Efficiency

Reduce communication costs with VoIP technology and eliminate expensive traditional phone systems.

Global Connectivity

Connect teams across locations with reliable and secure IP-based communication solutions.

4. Computing Solutions

SanayaTechs provides advanced computing solutions, including cloud, virtualization, and high-performance systems.

We deliver secure, scalable, and customized infrastructure that enhances productivity and supports your business goals.

Small Servers

Compact and cost-effective servers ideal for small businesses and basic workloads.

Tower Servers

Standalone server systems designed for growing businesses requiring reliable performance and expandability.

Rack Mount Servers

Space-efficient servers built for data centers, offering scalability and organized infrastructure management.

Blade Servers

High-density modular servers optimized for large-scale environments and advanced virtualization needs.

5. Storage Systems

SanayaTechs offers robust and scalable storage solutions designed to securely manage and store your critical business data. Our storage systems are tailored to meet the demands of modern businesses, providing high availability, fast access, and data protection.

Whether you need on-premises storage, cloud-based solutions, or a hybrid approach, our team ensures that your data is stored efficiently and is always accessible.

Network Attached Storage

Efficient file-level storage

Storage Area Network

High-performance block-level storage

6. Back-up & Data Protection

- **Regular Backups:** Automated, scheduled backups stored in secure, diverse locations.
- **Data Encryption:** Advanced encryption for data in transit and at rest.
- **Redundancy:** Multiple levels of redundancy to minimize data loss risks.
- **Disaster Recovery:** Robust plans to quickly restore data and operations.
- **Access Controls:** Strict authentication for authorized personnel only.
- **Regular Testing:** Frequent verification of backup systems and recovery plans.
- **Compliance:** Adherence to data protection regulations and standards.

Key Solutions

- Back-up Software
- Back-up Hardware
- Data Protection Solutions
- Disaster Recovery

Our commitment to data protection ensures that your information is safe, secure, and recoverable, providing you with peace of mind.

7. Private Cloud

Enhanced Security

Hosted on dedicated infrastructure for greater control. Advanced security measures include encryption, firewalls, and intrusion detection.

Customization

Highly customizable solutions aligned with specific business requirements. Configure resources and services to your needs.

Dedicated Resources

Dedicated CPU, memory, and storage ensuring optimal performance and reliability without resource contention.

Scalability

Easily scale resources up or down based on demands. Adjust capacity quickly and efficiently.

Compliance and Control

Maintain data control and ensure compliance with industry regulations. Supports various compliance frameworks.

Private Cloud - Support & Integration

24/7 Support

Our expert support team is available around the clock to assist with any issues, ensuring uninterrupted access and operation.

Seamless Integration

Smooth integration with existing systems and applications to ensure optimal performance and easy transition.

8. Public Cloud

SanayaTechs provides robust Public Cloud solutions designed to offer scalability, efficiency, and cost-effectiveness. Our Public Cloud services include:

Cost Efficiency

Pay only for the resources you use, reducing upfront costs and optimizing your IT budget.

Scalability

Easily scale resources up or down on demand, supporting growth and changing workloads without heavy infrastructure investment.

Global Reach

Access worldwide data centers for low latency, high availability, and reliable application performance.

Advanced Technologies

Benefit from the latest advancements in cloud computing technologies, including artificial intelligence, machine learning, and big data analytics, integrated into our Public Cloud offerings.

Automatic Updates

Enjoy the advantages of automatic updates and maintenance, ensuring that your systems and applications are always running on the latest versions with the newest features and security patches.

Security and Compliance

Our Public Cloud services incorporate robust security measures and compliance with industry standards to protect your data. We use advanced encryption, conduct regular security audits, and adhere to global compliance regulations.

Integration and Compatibility

Seamlessly integrate with a wide range of third-party applications and services, enhancing your operational efficiency and productivity.

Support and Management

Access expert support and management services to assist with any issues or queries, ensuring smooth operation and optimal performance of your Public Cloud resources.

Sanaya Techs' Public Cloud solutions provide a flexible, secure, and cost-effective environment to support your business's diverse needs and drive innovation.

9. Physical Security

SanayaTechs offers comprehensive Physical Security solutions designed to protect your assets and ensure a safe environment. Our services include:

Access Control Systems: Implement advanced access control solutions such as biometric scanners, keycard systems, and electronic locks to regulate and monitor entry to your facilities. Customize access levels and track personnel movements to enhance security.

9. Physical Security

Surveillance Systems: Deploy high-definition IP CCTV cameras and monitoring systems to oversee and record activities within and around your premises. Our solutions include remote access capabilities and intelligent analytics for proactive security management.

9. Physical Security

Intrusion Detection: Protect your property with sophisticated intrusion detection systems that include motion sensors, glass break detectors, and alarm systems. These systems provide real-time alerts and help prevent unauthorized access.

9. Physical Security

Perimeter Security: Strengthen your property's perimeter with physical barriers such as fences, gates, and security bollards. Enhance safety with controlled access points and monitoring to secure the boundary of your premises.

9. Physical Security

Environmental Monitoring: Ensure the safety of critical infrastructure with environmental monitoring systems that detect changes in temperature, humidity, and other factors. Implement fire detection and suppression systems to protect against fire hazards.

9. Physical Security

Security Personnel: Offer professional security services, including on-site security guards and patrols, to provide an additional layer of protection and respond promptly to any security incidents.

Emergency Preparedness: Develop and implement emergency response plans and procedures to handle various scenarios, including natural disasters and security breaches. Conduct regular drills and training for staff to ensure preparedness.

Integrated Solutions: Combine multiple security measures into a cohesive strategy for comprehensive protection. Our solutions are designed to integrate seamlessly with your existing systems and infrastructure.

Sanaya Techs' Physical Security solutions provide robust, multi-layered protection to safeguard your assets, ensure the safety of your personnel, and maintain the integrity of your operations.

10. Data Centers

Fixed / Traditional Data Center: Integrated power, cooling, and IT infrastructure delivering secure and reliable data center performance.

Micro Data Center: Single-rack solution for industrial IT, supporting IIoT and IT/OT integration.

Modular Data Center: Flexible, high-performance infrastructure designed for scalable deployment.

Mobile / Containerized Data Center: Portable, pre-built data center unit for rapid deployment in remote or temporary locations.

Uptime standards: Portable, pre-built data center unit for rapid deployment in remote or temporary locations.

10. Data Centers

Sanaya Techs' Data Center solutions provide a secure, scalable, and efficient environment to support your critical IT infrastructure and drive your business's success.

1. Fixed Data Center
2. Micro Data Center
3. Modular Data Center
4. Mobile Data Center (Container)
5. Uptime Standards.

11. Software

We deliver integrated digital solutions tailored to optimize business operations and drive growth. Our expertise includes ERP implementation, custom software development, and enterprise automation.

- Odoo ERP Implementation & Customization
- HR Management Systems
- Inventory & Warehouse Management Systems
- Accounting & Financial Management Systems
- Sales, CRM & Procurement Solutions
- Mobile Application Development (iOS & Android)
- Web Application Development
- Custom ERP Development
- Enterprise Software Development
- Business Process Automation
- System Integration & Deployment
- Software Maintenance & Technical Support
- Custom Software Development Upon Client Request

SERVICES

Professional Services SanayaTechs offers a comprehensive range of Professional Services designed to support and enhance your technology infrastructure and operations. Our expert team delivers tailored solutions and strategic guidance to help you achieve your business goals. Our Professional Services include:

Consulting Services

Benefit from strategic consulting to assess your technology needs, identify opportunities for improvement, and develop a roadmap for implementing effective solutions. Our consultants provide expert advice on IT strategy, digital transformation, and technology adoption.

Project Management

Ensure the successful delivery of your technology projects with our experienced project management team. We oversee all aspects of project execution, from planning and resource allocation to implementation and monitoring, ensuring that projects are completed on time and within budget.

System Integration

Seamlessly integrate new technologies with your existing systems to enhance functionality and streamline operations. Our integration services include hardware and software integration, data migration, and the development of custom solutions to fit your specific needs.

Technical Support

Receive expert technical support to address and resolve any issues with your IT infrastructure. Our support services include troubleshooting, maintenance, and repair to ensure the smooth operation of your systems and minimize downtime.

SERVICES

Training and Development

Equip your team with the skills and knowledge needed to effectively use and manage your technology solutions. We offer tailored training programs and workshops to enhance your team's proficiency and ensure they are up to date with the latest technologies.

Managed Services

Outsource the management of your IT infrastructure to our team of experts. Our managed services include monitoring, maintenance, and optimization of your technology systems, allowing you to focus on your core business while we handle day-to-day management.

Security Assessments

Conduct thorough security assessments to identify vulnerabilities and implement robust security measures to protect your data and systems. Our security experts provide risk assessments, vulnerability scans, and actionable recommendations to improve your security posture.

Custom Solutions Development

Develop bespoke technology solutions tailored to your unique business requirements. Our team works closely with you to design and implement custom software, applications, and systems that address your specific challenges and objectives.

Why Choose SanayaTechs

Expertise

Highly skilled team with extensive industry experience

Innovation

Cutting-edge solutions leveraging latest technologies

Reliability

Proven track record of successful implementations

Customer Focus

Dedicated to understanding and meeting your unique needs

Support

Comprehensive support and partnership throughout your journey

Meet Our Expert Team

Our team comprises seasoned professionals with deep expertise in various technology domains. We bring together diverse skill sets and industry experience to deliver comprehensive solutions that drive your business success.

Strategic Advisors

Success Stories

We have successfully delivered transformative technology solutions to organizations across various industries, helping them achieve their strategic objectives and drive measurable business impact.

Finance Sector

Secure infrastructure and data protection solutions for leading financial institutions.

Healthcare

Digital transformation and patient data management systems for healthcare providers.

Retail & E-commerce

Scalable cloud solutions and high-performance networks for retail chains.

Our Approach

1

Discovery

Understanding your business needs and challenges

2

Strategy

Developing tailored solutions and plans

3

Implementation

Executing solutions with minimal disruption

4

Optimization

Continuous improvement and monitoring

5

Support

Ongoing partnership and assistance

Technology Partners

We partner with leading technology vendors to provide best-in-class solutions and ensure you have access to the latest innovations and industry standards.
