SanayaTechs Company Profile

About Us

At SanayaTechs, we are committed to pioneering innovative technological solutions that empower businesses to thrive in a digital world. Our team of experts specializes in delivering cutting-edge software development, IT consulting, and digital transformation services tailored to meet the unique needs of each client. With a focus on quality, efficiency, and customer satisfaction, we strive to turn challenges into opportunities, driving growth and success in an ever-evolving technological landscape. Partner with us to unlock the full potential of your business.

OUR VISION

At SanayaTechs, our vision is to be a global leader in technological innovation, driving the future of digital transformation. We aspire to create a world where businesses seamlessly integrate advanced technology to unlock their full potential, foster growth, and achieve sustainable success. By continually pushing the boundaries of what's possible, we aim to empower organizations to navigate the complexities of the digital age with confidence and agility.

MISSION

At SanayaTechs, our mission is to deliver innovative and reliable technological solutions that empower businesses to achieve their strategic goals. We are dedicated to excellence in every project, ensuring that our clients can harness the power of technology to drive growth, improve efficiency, and stay ahead in an ever-evolving digital landscape. Through collaboration, expertise, and a customer-centric approach, we strive to be the trusted partner that helps businesses navigate their digital transformation journeys with success

SOLUTIONS

1. Networking & Security Solutions

At SanayaTechs, we offer comprehensive networking and security solutions designed to protect your business from evolving cyber threats while ensuring seamless connectivity. Our services include robust network infrastructure design, implementation, and ongoing management, combined with advanced security measures such as firewalls, intrusion detection systems, and encryption. We focus on providing secure, scalable, and reliable solutions that support your business's growth and resilience in the digital age.

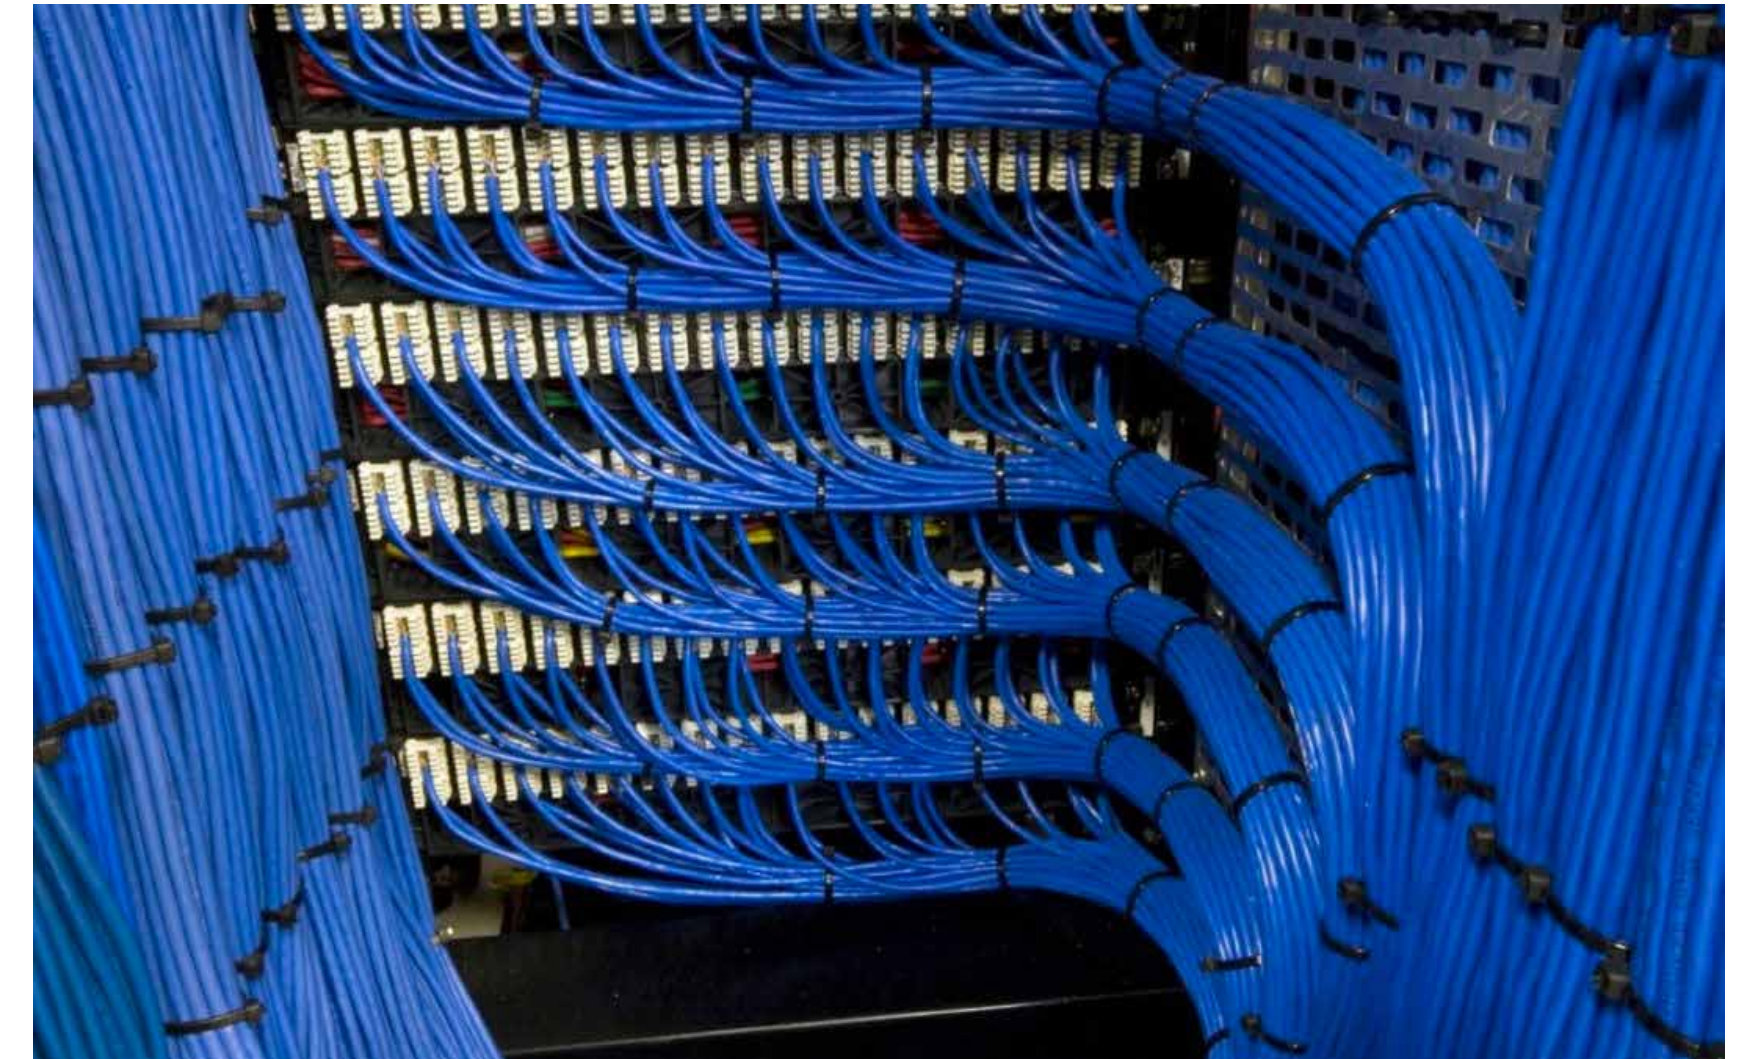

1. Software defined network
2. WAN and LAN Infrastructure
3. Data Center Networking
4. Wireless Solutions
5. Network monitoring and Management
6. End Point Protection and Teleworkers solutions
7. Security Fabric (orchestration and automation)
8. Next- Generation Firewall
9. Secure SD-WAN
10. Advanced threat protection
11. SOC Platforms (Analytics, Reporting & Response, SIEM)
12. Web Application Security
13. Secure email Gateway
14. secure remote access
15. Data Leak Prevention and risk Management

2. Structured Cabling

SanayaTechs provides reliable and scalable structured cabling solutions tailored to meet the communication needs of modern businesses. Our expert team designs and installs efficient cabling systems that support high-speed data transfer, voice communication, and advanced networking infrastructure. With a focus on quality and futureproofing, our structured cabling solutions ensure seamless connectivity and optimal performance, enabling your business to stay connected and competitive

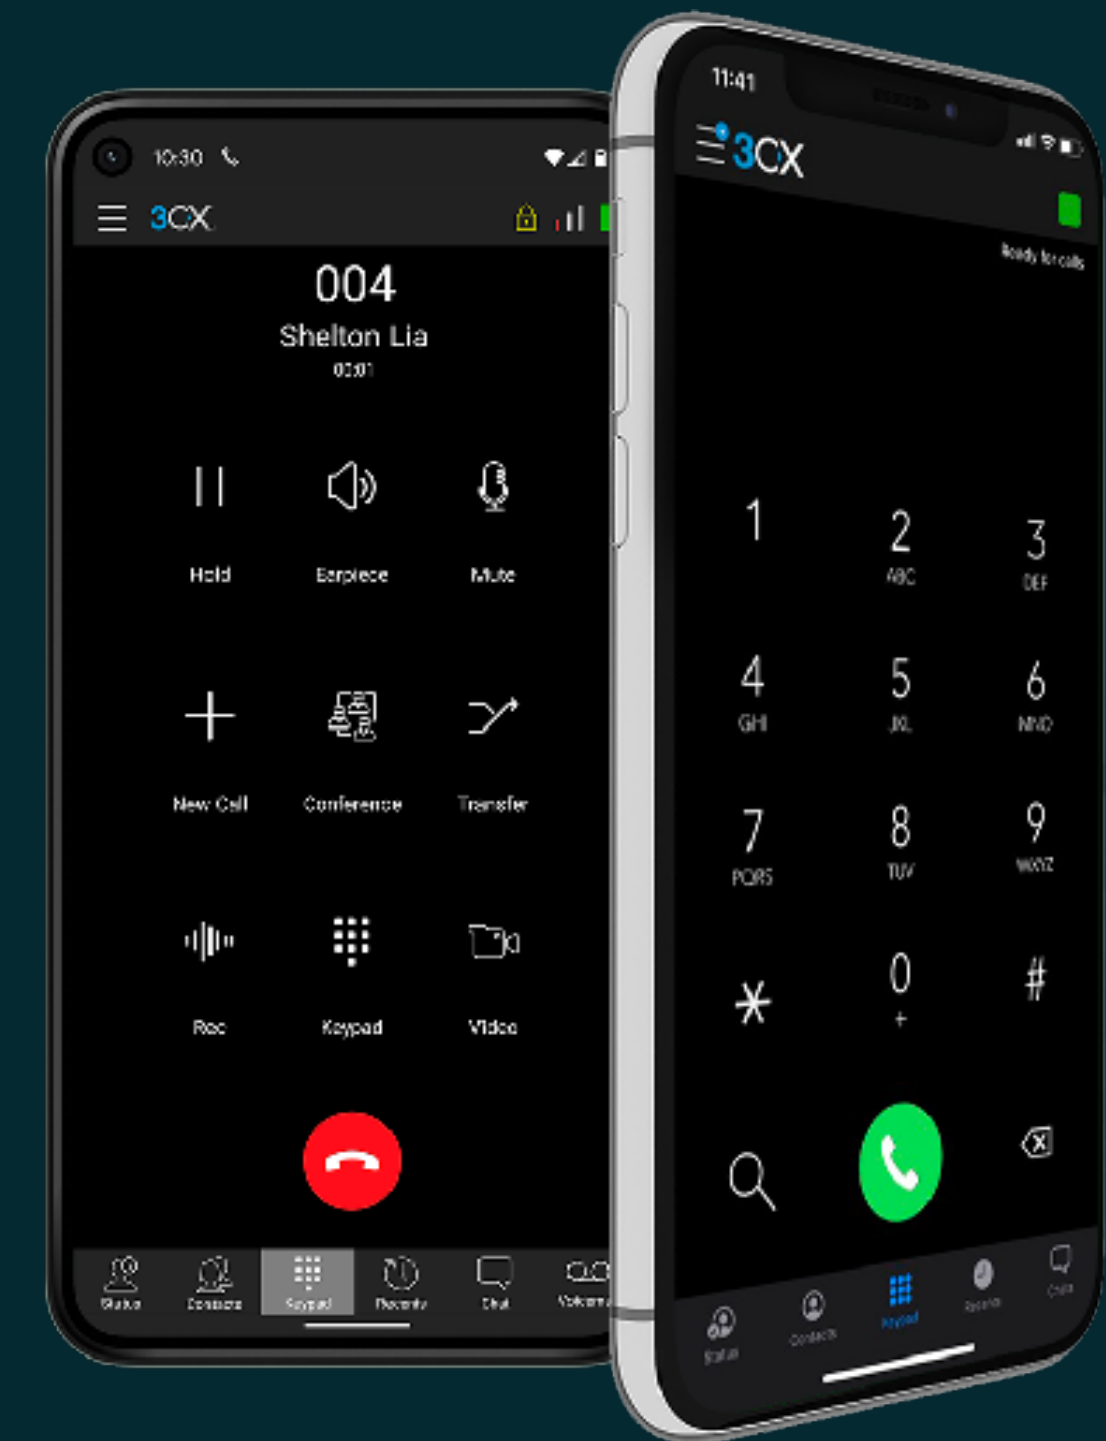

1. Planning and design
2. Campus Structured Cabling
3. Data Center Networking
4. Data Center cabling
5. Copper and Fiber Optic cabling
6. Proper termination and testing

3. IP Telephony & Video Conferencing Systems

SanayaTechs offers advanced IP telephony and video conferencing solutions that streamline communication for businesses of all sizes. Our systems provide high-quality voice and video connectivity, enabling seamless collaboration across teams, whether they are in the same building or spread across the globe. With a focus on reliability, scalability, and ease of use, our solutions ensure that your organization stays connected, productive, and responsive in today's fast-paced digital environment

1. Unified communication and collaboration
2. Business Communication Solutions & Software
3. Video Conferencing Rooms
4. Video Gateways

4. Computing

SanayaTechs delivers cutting-edge computing solutions designed to meet the diverse needs of businesses in today's digital landscape. From cloud computing and virtualization to high-performance servers and workstations, we provide customized solutions that enhance productivity, scalability, and efficiency. Our team of experts ensures that your computing infrastructure is robust, secure, and optimized for your specific business requirements, enabling you to achieve your strategic objectives with confidence

1. Small Servers
2. Tower Servers
3. Rack Mount Servers
4. Blade Servers

5. Storage Systems

SanayaTechs offers robust and scalable storage solutions designed to securely manage and store your critical business data. Our storage systems are tailored to meet the demands of modern businesses, providing high availability, fast access, and data protection. Whether you need on-premises storage, cloud-based solutions, or a hybrid approach, our team ensures that your data is stored efficiently and is always accessible, supporting your organization's growth and operational continuity

1. Network Attached Storage

2. Storage Area Network

6 . Back-up & Data Protection

At SanayaTechs, we prioritize the security and integrity of your data. Our comprehensive backup and data protection strategy includes

1. **Regular Backups** : We perform automated, scheduled backups of all critical data to ensure that it is consistently saved and up to date. Backups are stored in secure geographically diverse locations to protect against data loss
2. **Data Encryption** : All data, both in transit and at rest, is encrypted using advanced encryption standards to safeguard against unauthorized access and breaches
3. **Redundancy** : Our infrastructure includes redundancy at multiple levels to minimize the risk of data loss due to hardware failures or other issues
4. **Disaster Recovery** : We have a robust disaster recovery plan in place to quickly restore data and operations in the event of a significant incident or system failure

5. **Access Controls** : Strict access controls and authentication mechanisms are implemented to ensure that only authorized personnel can access sensitive data and backup systems

6. **Regular Testing** : Backup systems and disaster recovery plans are regularly tested to verify their effectiveness and to identify any potential improvements

7. **Compliance** : Our practices adhere to relevant data protection regulations and standards to ensure compliance and best practices in data security

Our commitment to data protection ensures that your information is safe, secure, and recoverable, providing you with peace of mind and uninterrupted service

1. Back-up Software
2. Back-up Hardware
3. Data Protection solutions and Retention time
4. Disaster recovery

7. Private Cloud

SanayaTechs offers tailored Private Cloud solutions to meet your organization's unique needs. Our Private Cloud provides

Enhanced Security : With a Private Cloud, your data and applications are hosted on a dedicated infrastructure, ensuring greater control over security and privacy. We implement advanced security measures, including encryption, firewall protection, and intrusion detection

Customization : Our Private Cloud solutions are highly customizable to align with your specific business requirements. You have the flexibility to configure resources, applications, and services according to your needs

Dedicated Resources : Unlike public clouds, a Private Cloud provides dedicated resources such as CPU, memory, and storage, ensuring optimal performance and reliability without resource contention

Scalability : Easily scale your cloud resources up or down based on your business demands. Our Private Cloud allows you to adjust capacity quickly and efficiently

Compliance and Control : Maintain control over your data and ensure compliance with industry regulations and standards. Our Private Cloud supports various compliance frameworks to meet your organizational and regulatory requirements

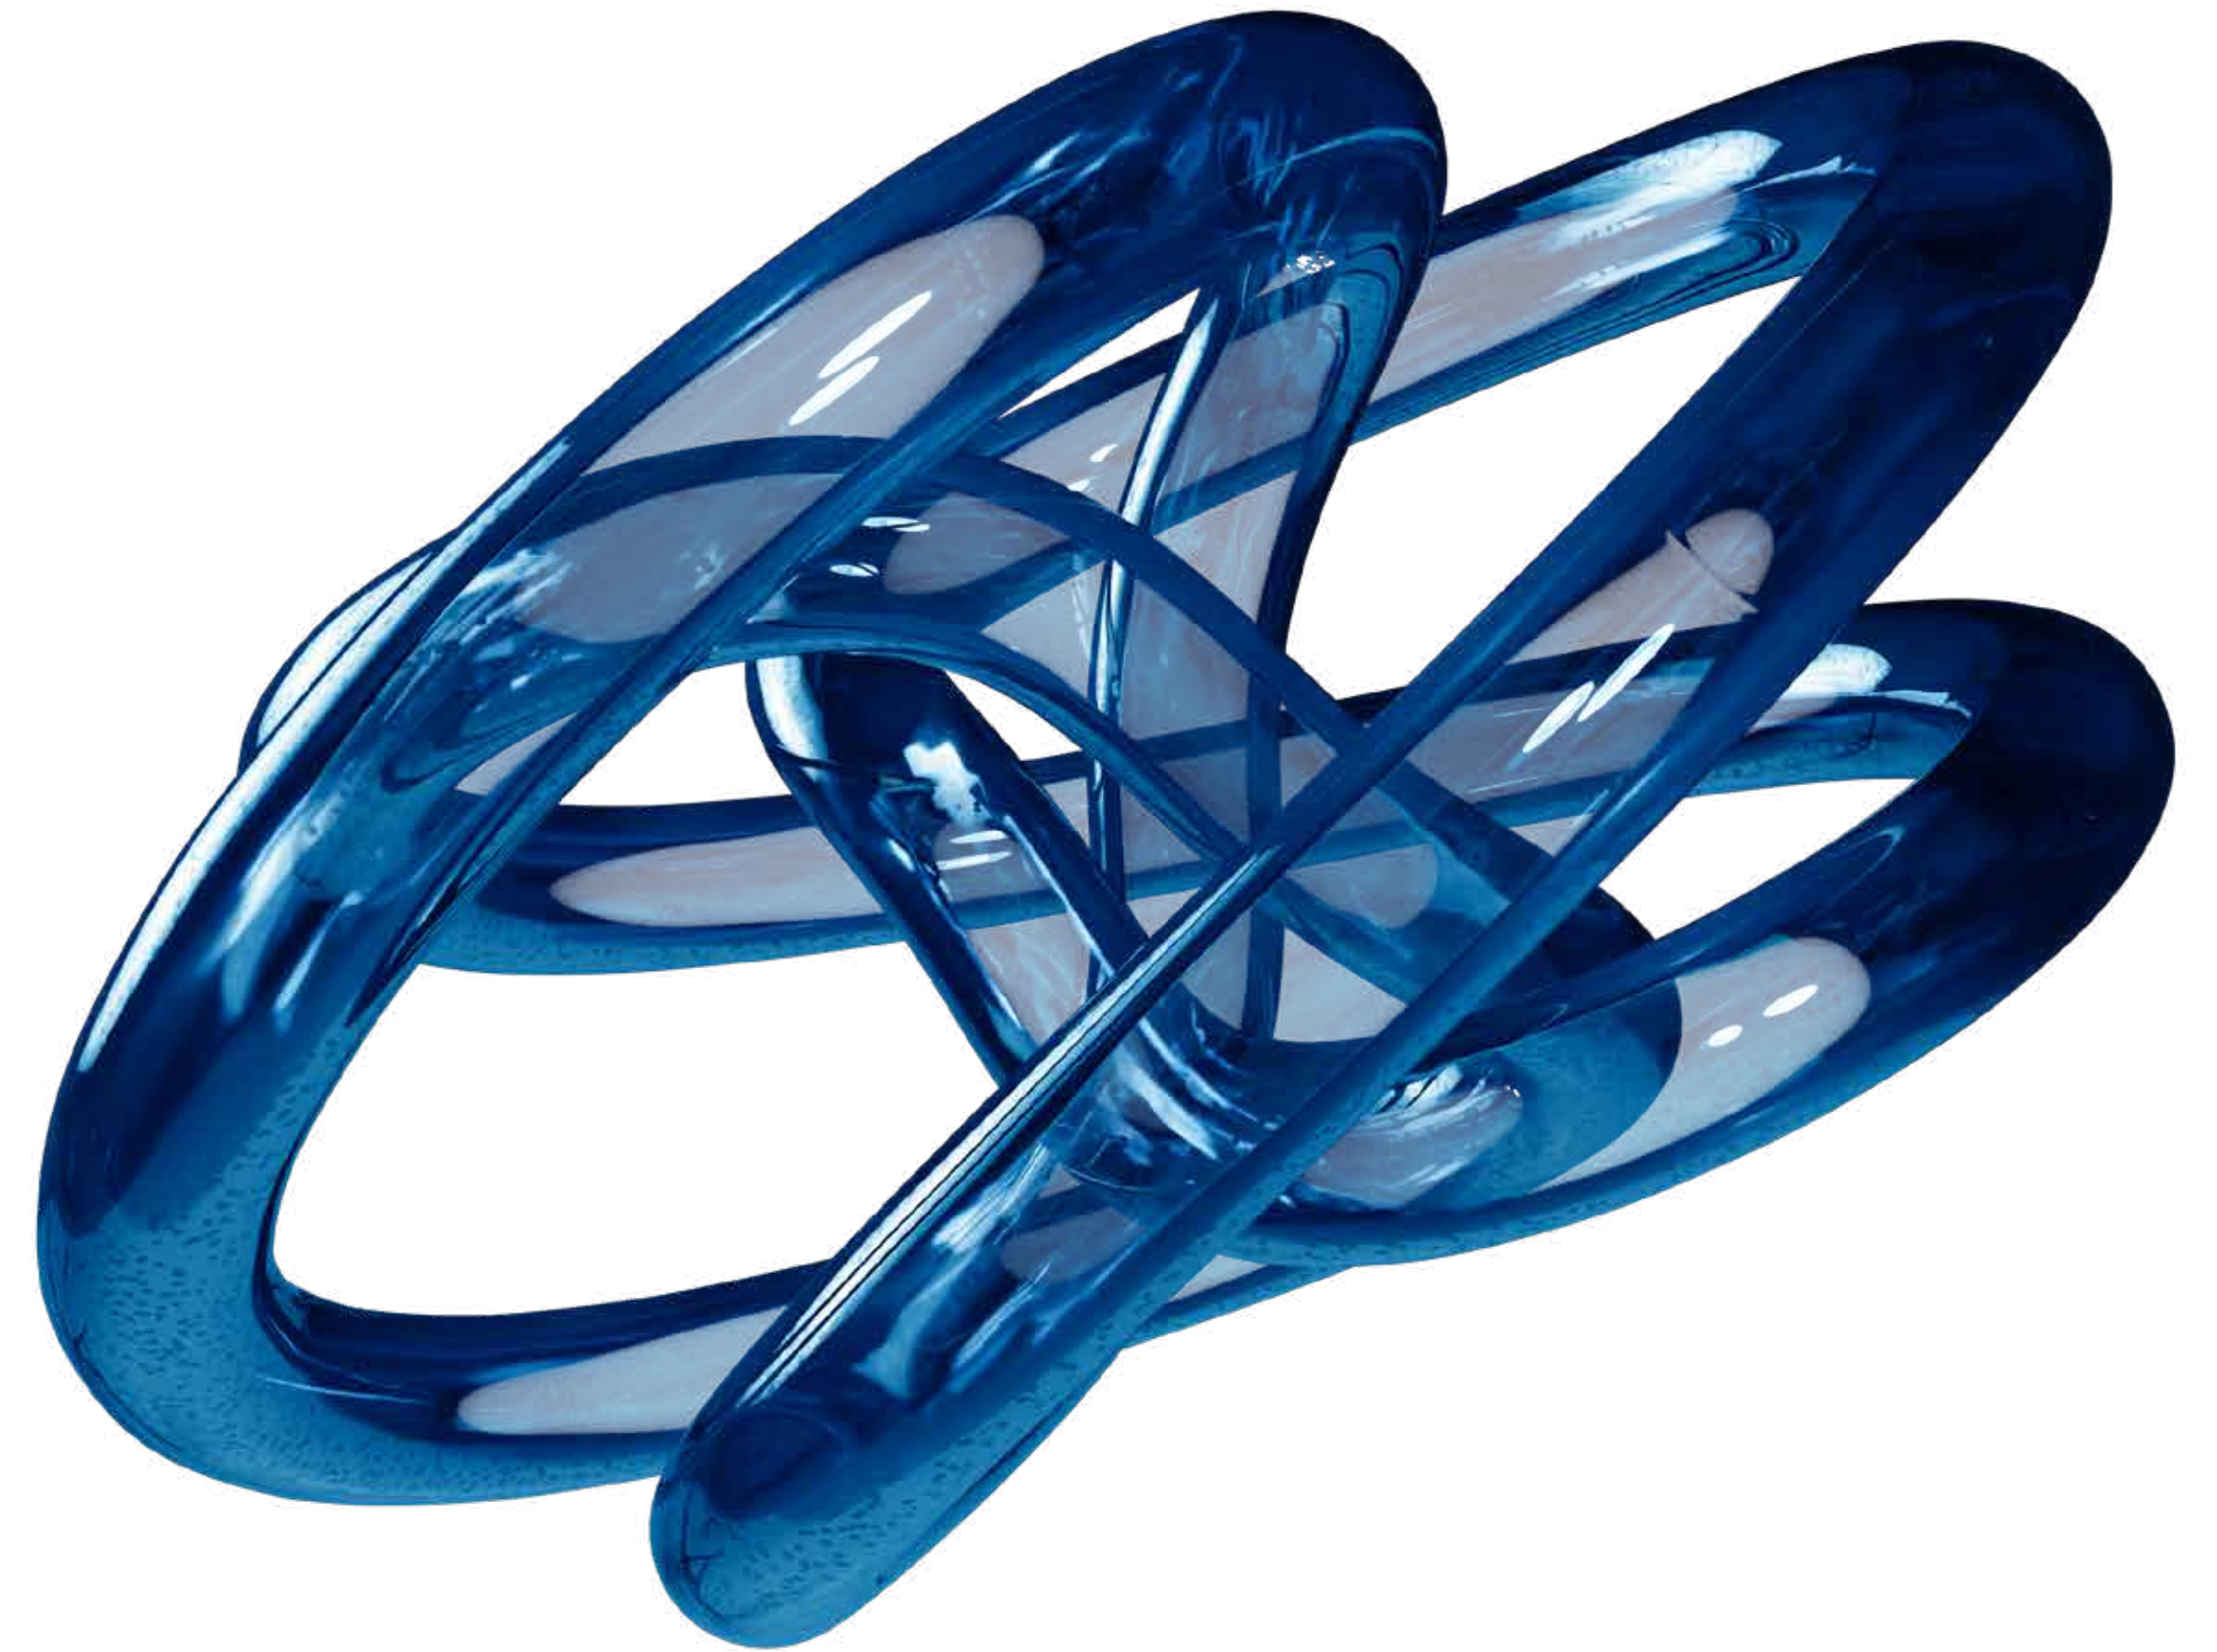

Support 7/24 : Our expert support team is available around the clock to assist with any issues or inquiries, ensuring uninterrupted access and operation of your Private Cloud environment

Integration : Seamlessly integrate with your existing IT infrastructure and applications, enhancing productivity and operational efficiency

SanayaTechs' Private Cloud provides a secure, flexible, and high-performance environment designed to support your business's critical operations and growth

1. Platform as a Service
2. Infrastructure as a Service
3. Software as a Service
4. Software Defined Data Center

8. Public Cloud

SanayaTechs provides robust Public Cloud solutions designed to offer scalability, efficiency, and cost-effectiveness. Our Public Cloud services include

Cost Efficiency : Leverage a pay-as-you-go pricing model that allows you to only pay for the resources you use, reducing upfront costs and optimizing your IT budget

Scalability : Easily scale resources up or down based on your needs with our on-demand Public Cloud services. This flexibility supports your growing business and fluctuating workloads without the need for extensive infrastructure investments

Global Reach : Access a network of data centers around the world, ensuring low latency and high availability for users across different regions. This global presence enhances the performance and reliability of your applications

Advanced Technologies : Benefit from the latest advancements in cloud computing technologies, including artificial intelligence, machine learning, and big data analytics, integrated into our Public Cloud offerings

Automatic Updates : Enjoy the advantages of automatic updates and maintenance, ensuring that your systems and applications are always running on the latest versions with the latest features and security patches

Security and Compliance : Our Public Cloud services incorporate robust security measures and compliance with industry standards to protect your data. We use advanced encryption, regular security audits, and adherence to global compliance regulations

Integration and Compatibility : Seamlessly integrate with a wide range of third-party applications and services, enhancing your operational efficiency and productivity

Support and Management

Access expert support and management services to assist with any issues or queries, ensuring smooth operation and optimal performance of your Public Cloud resources

SanayaTechs' Public Cloud solutions provide a flexible, secure, and cost-effective environment to support your business's diverse needs and drive innovation

SANAYA

9. Physical Security

SanayaTechs offers comprehensive Physical Security solutions designed to protect your assets and ensure a safe environment. Our services include

Access Control Systems : Implement advanced access control solutions such as biometric scanners, keycard systems, and electronic locks to regulate and monitor entry to your facilities. Customize access levels and track personnel movements to enhance security

Surveillance Systems : Deploy high-definition IP CCTV cameras and monitoring systems to oversee and record activities within and around your premises. Our solutions include remote access capabilities and intelligent analytics for proactive security management

Intrusion Detection : Protect your property with sophisticated intrusion detection systems that include motion sensors, glass break detectors, and alarm systems. These systems provide real-time alerts and help prevent unauthorized access

Perimeter Security : Strengthen your property's perimeter with physical barriers such as fences, gates, and security bollards. Enhance safety with controlled access points and monitoring to secure the boundary of your premises

Environmental Monitoring : Ensure the safety of critical infrastructure with environmental monitoring systems that detect changes in temperature, humidity, and other factors. Implement fire detection and suppression systems to protect against fire hazards

Security Personnel: Offer professional security services, including on-site security guards and patrols, to provide an additional layer of protection and respond to any security incidents promptly

Emergency Preparedness : Develop and implement emergency response plans and procedures to handle various scenarios, including natural disasters and security breaches. Conduct regular drills and training for staff to ensure preparedness

Integrated Solutions : Combine multiple security measures into a cohesive strategy for comprehensive protection. Our solutions are designed to integrate seamlessly with your existing systems and infrastructure

SanayaTechs' Physical Security solutions provide robust, multi-layered protection to safeguard your assets, ensure the safety of your personnel, and maintain the integrity of your operations

10 .Data Centers

SanayaTechs offers cutting-edge Data Center solutions to support your business's critical IT infrastructure needs. Our data centers are designed for high performance, security, and reliability Our services include

State-of-the-Art Infrastructure : Our data centers feature the latest technology and infrastructure to ensure efficient and reliable operations. This includes advanced server racks, cooling systems, power distribution, and network connectivity

High Availability : We provide robust high-availability solutions with redundant power supplies, backup generators, and failover systems to minimize downtime and ensure continuous operations

Security and Compliance : Our data center adhere to stringent security protocols, including physical security measures, access controls, and surveillance systems. We also comply with industry standards and regulations to protect your data and maintain regulatory compliance

Scalability: Easily scale your data center resources to accommodate growth and changing needs. Our flexible infrastructure allows for quick adjustments in capacity and performance to meet evolving demands

Environmental Controls : Maintain optimal conditions for your equipment with advanced environmental controls, including precise temperature and humidity regulation, as well as fire detection and suppression systems

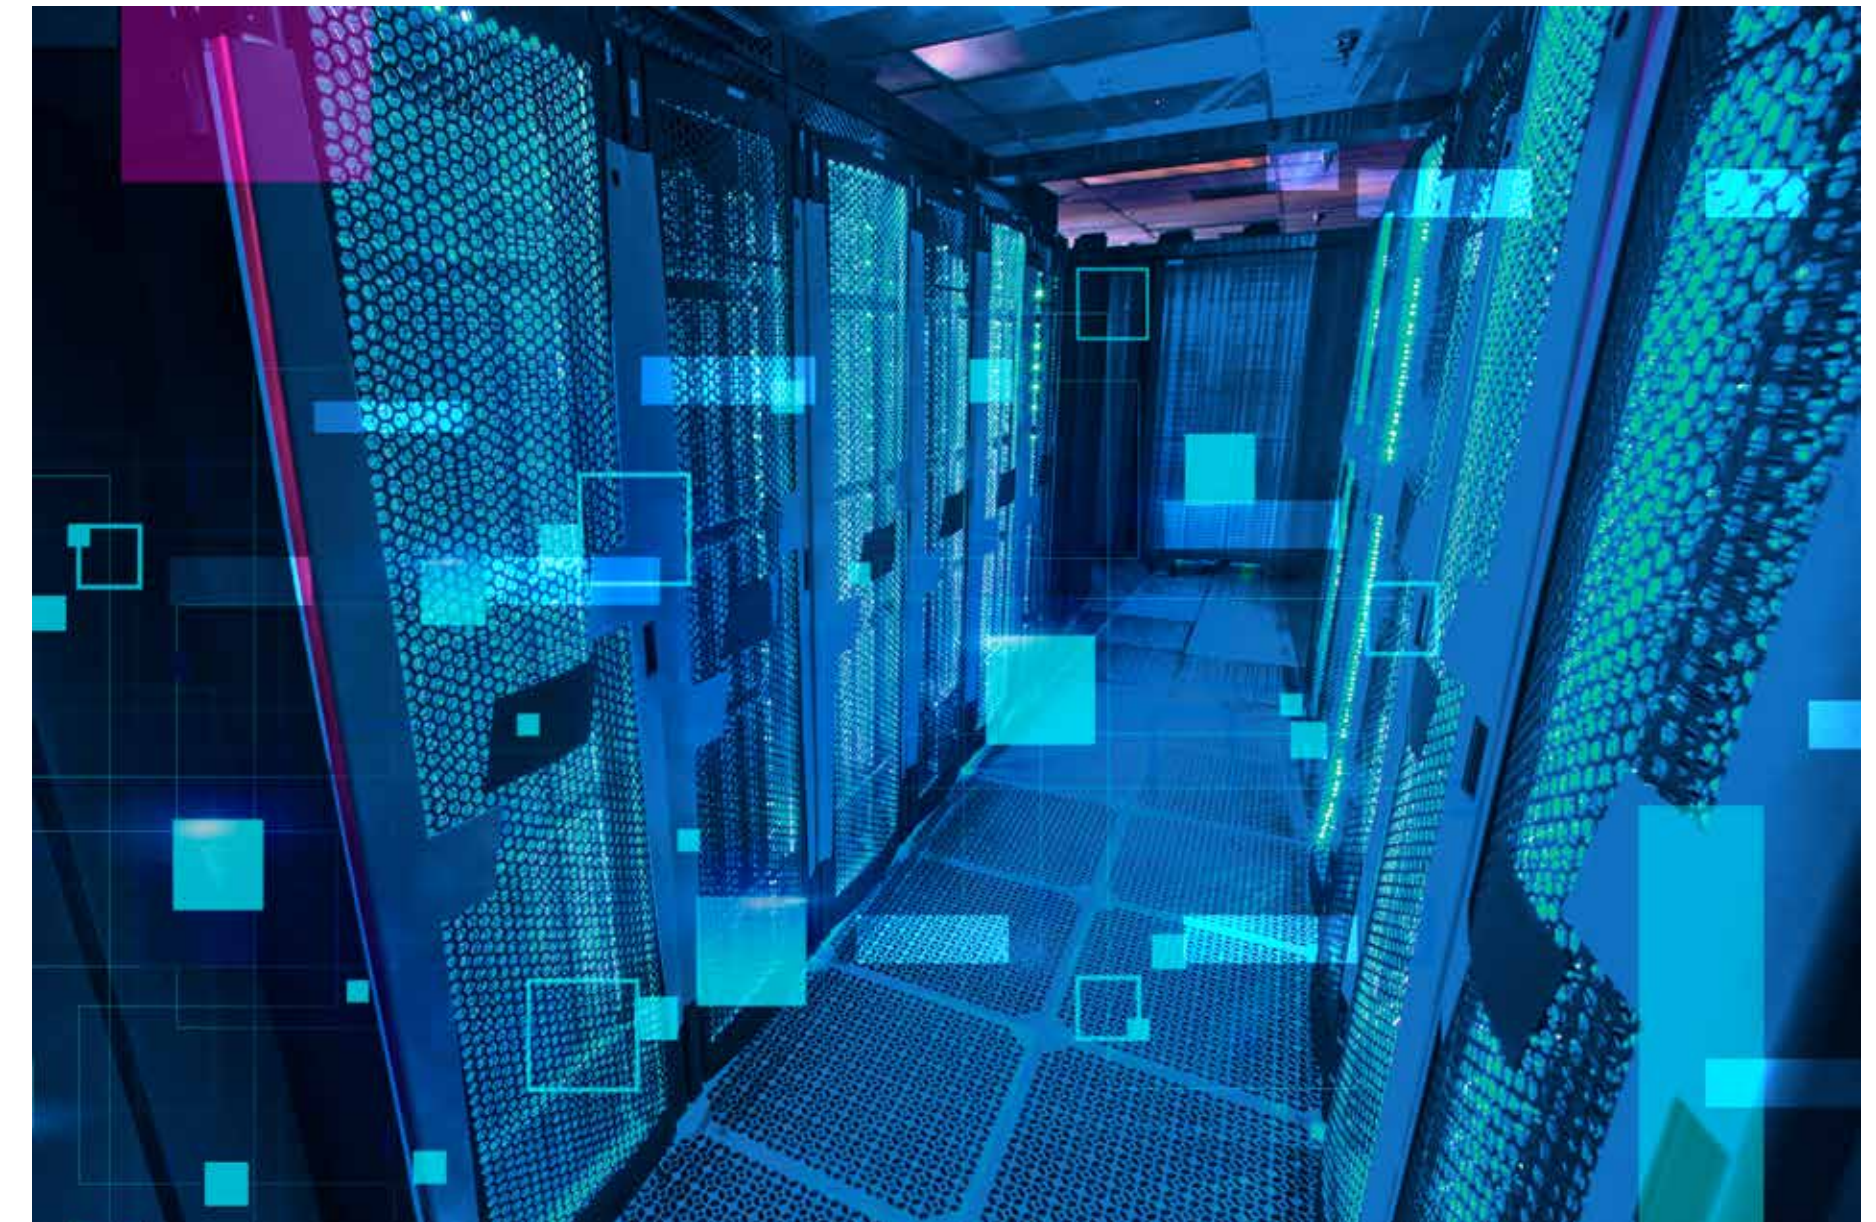

Network Connectivity : Benefit from high-speed, reliable network connectivity with multiple carrier options and redundant network paths to ensure fast and uninterrupted access to your data

Disaster Recovery : Implement effective disaster recovery solutions to safeguard against data loss and ensure business continuity. Our data centers offer backup and recovery services to quickly restore operations in the event of a disaster

Monitoring and Support : Receive round-the-clock 7/24 monitoring and support from our expert team to ensure the ongoing health and performance of your data center. Our support services include proactive maintenance and rapid response to any issues

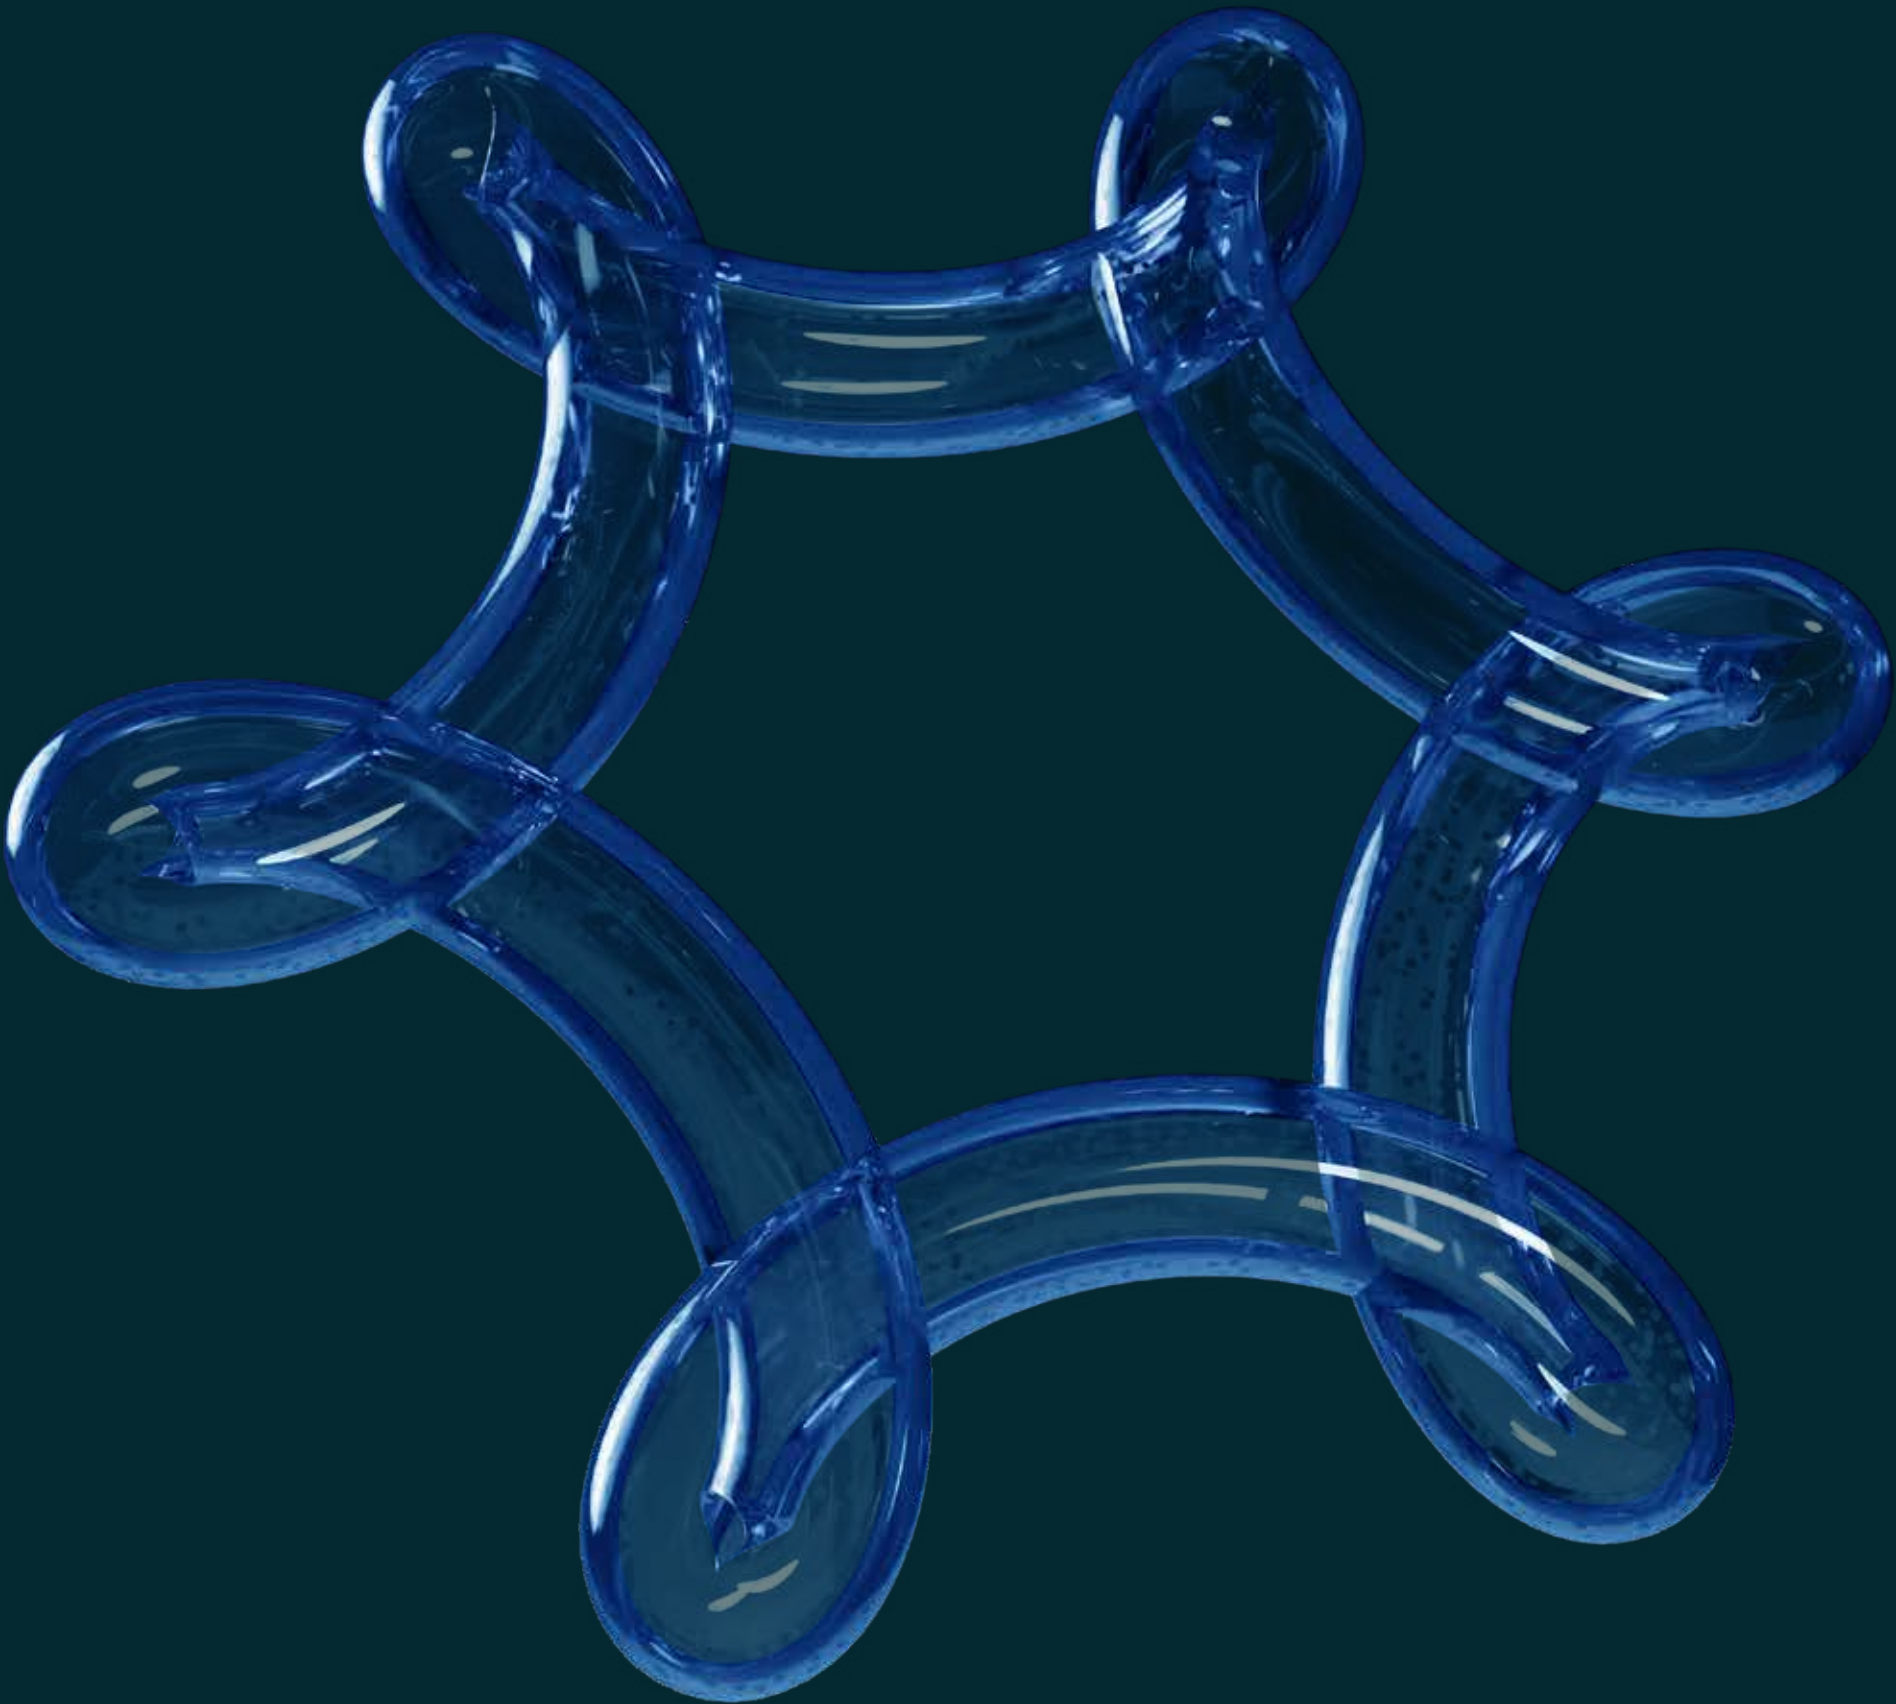

SanayaTechs' Data Center solutions provide a secure, scalable, and efficient environment to support your critical IT infrastructure and drive your business's success

1. Fixed Data Center
2. Micro Data Center
3. Modular Data Center
4. Mobile Data Center (Container)

11. Software

Enterprise Resource Planning
E-learning Solutions
Document Management System
Intelligent Business Process M
Hospital Information Management System

SERVICES

Professional Services

SanayaTechs offers a comprehensive range of Professional Services designed to support and enhance your technology infrastructure and operations. Our expert team delivers tailored solutions and strategic guidance to help you achieve your business goals. Our Professional Services include

Consulting Services : Benefit from strategic consulting to assess your technology needs, identify opportunities for improvement, and develop a roadmap for implementing effective solutions. Our consultants provide expert advice on IT strategy, digital transformation, and technology adoption.

Project Management : Ensure the successful delivery of your technology projects with our experienced project management team. We oversee all aspects of project execution, from planning and resource allocation to implementation and monitoring, ensuring that projects are completed on time and within budget.

System Integration : Seamlessly integrate new technologies with your existing systems to enhance functionality and streamline operations. Our integration services include hardware and software integration, data migration, and the development of custom solutions to fit your specific needs.

Technical Support : Receive expert technical support to address and resolve any issues with your IT infrastructure. Our support services include troubleshooting, maintenance, and repair to ensure the smooth operation of your systems and minimize downtime.

Training and Development : Equip your team with the skills and knowledge needed to effectively use and manage your technology solutions. We offer tailored training programs and workshops to enhance your team's proficiency and ensure they are up-to-date with the latest technologies

Managed Services : Out source the management of your IT infrastructure to our team of experts. Our managed services include monitoring, maintenance, and optimization of your technology systems, allowing you to focus on your core business while we handle the day-to-day management

Security Assessments : Conduct thorough security assessments to identify vulnerabilities and implement robust security measures to protect your data and systems. Our security experts provide risk assessments, vulnerability scans, and recommendations for improving your security posture

Custom Solutions Development : Develop bespoke technology solutions tailored to your unique business requirements. Our team works closely with you to design and implement custom software, applications, and systems that address your specific challenges and objectives

SanayaTechs' Professional Services are designed to provide you with the expertise, support, and solutions needed to optimize your technology infrastructure and drive your business forward
